WHAT REPORTS ARE AVAILABLE?

The HOSS includes a variety of weekly and monthly reports, and like all SDS products, reports can be customized to the user's requirements.

WHAT ABOUT CONSECUTIVE

STARTS, LIMBO TIME, AND TOTAL

SERVICE HOURS?

On our main screen, the operator is presented with the employee's last service, number of starts in a row, limbo time and total service time for a month. The do not contact before date and time is computed for each employee, dependent of their rest and number of starts situation.

CAN THE HOSS INTERFACE WITH

MY PAYROLL SYSTEM?

Since the HOSS is Microsoft Access based, there are a number of data export and import options available to the user, and SDS can set these up for the user if they desire.

HOURS OF SERVICE

MANAGEMENT

TOOLS DESIGNED

SPECIFICALLY

FOR THE

Small Railroad

RUNNING A SMALL RAILROAD MADE EASIER

AT SDS, RUNNING A SMALL RAILROAD IS MADE EASIER WITH TOOLS CUSTOMIZED TO HOW <u>YOU</u> DO BUSINESS.

OK. I WANT TO SEE MORE. WHAT

Contact SDS at the address below. We will be

happy to arrange an online demonstration of

the system, and answer any questions you might have. We can also come out to your

site to meet with you and your personnel to

demonstrate any or all of our products.

SHOULD I DO?

WHAT IS THE HOSS?

The Hours Of Service System (HOSS) is a set of tools that help you comply with the new Hours of Service laws.

IS THE HOSS AN ELECTRONIC

RECORD KEEPING SYSTEM?

As defined by the rules, no. You will still need to have a signed paper time sheet for your employees in covered service. The HOSS has been designed as a manager's system to help organize your records.

How does the HOSS help my

RAILROAD MEET THE HOS

RULES?

Most railroads already have an efficient paper timekeeping system in place, and making a change to a fully electronic system would not be cost or resource efficient. The HOSS will help you keep all of your HOS information organized, and allow you to create the reports that the FRA will require to ensure your compliance with the rules. The HOSS will also let you keep track of employees that only serve in covered service occasionally, for which you still need to show their proper rest before they work

WHAT TYPE OF EQUIPMENT DOES

THE HOSS REQUIRE?

The HOSS will run on any Windows PC with MS Access 2007 or the MS Access 2007 Runtime installed. The HOSS can also be installed on a network.

WITH THE HOSS, THE ABILITY TO ORGANIZE YOUR HOURS OF SERVICE DATA IS RIGHT AT YOUR FINGERTIPS

Navigation Pane												
Navigation Pane												

A - Employee name and ID Number. Employees that have worked during that pay week are listed.

B - Date, pay week, and service month.

C - Date and time when the employee's last service ended.

D - Number of hours worked during the last service.

E - Hours that have elapsed since the last service.

F - Consecutive starts. If an employee has made more than five starts, the box will turn orange.

 ${\rm G}$ - Limbo hours and covered service hours for that service month

H - Pop up forms that list that employee's work shifts for the pay week or month.

I - Entry of work shifts is done on a simple pop up form.

J - The system includes a selection of weekly and monthly reports.

K - System setup or record edits can be accomplished on a group of easy to use forms.
